

## Bring the Bank to Your Office

To be successful in today's economy, businesses need to work smarter and more efficiently. Remote Deposit Solution (RDS) allows you to do this by bringing the bank to your office. When you need to make deposits, you no longer have to drive to the bank or wait for a courier. Follow a simple process and funds will be deposited into your account.

### Environmentally Friendly

RDS has been coined the "Green Machine," for alleviating added pressure on the environment seeing as you no longer have to drive to the bank to make deposits. Enjoy knowing that you are doing your part for the environment while also saving time and money.

### Simple Process Big Results

RDS is quick and easy-to-use through our secure website. Just scan the checks from the convenience of your desktop and the images are electronically transmitted to the bank. You don't need to fill out a deposit slip and credit is available the very next business day. Our existing clients rave about how this innovative solution has improved their company's efficiency and profitability.
